MBA PROGRAM OBJECTIVE
To provide students with the interdisciplinary and interdepartmental training necessary for professional careers in finance, management, or administration.

ONLINE FOCUS
This new focus is designed for students who live out of the region or cannot attend traditional classroom sessions. It is ideal for military personnel subject to TDY assignments or changes in duty stations. If you have internet access, you can complete the courses. The course work can be completed on your schedule and are not tied to a particular class time.

The courses have the same content, rigor, and quality found in the on-campus courses, and the program is fully accredited by AACSB International.

CURRICULUM
The online MBA is the same 30-hour program as the on-campus MBA with eight core and two focus courses.

FOUNDATION COURSES
There are two ways to complete the foundation courses, if required. Either online, or through our innovative FAST-TRACK program. This is a set of four, self-paced courses that allow completion more quickly than the regular online undergraduate courses. Choose the approach that best fits your situation.
